

Kitchen Countdown

Mixed Reality Project by Greta Karbon, Hannes Röd & Johannes Schneider

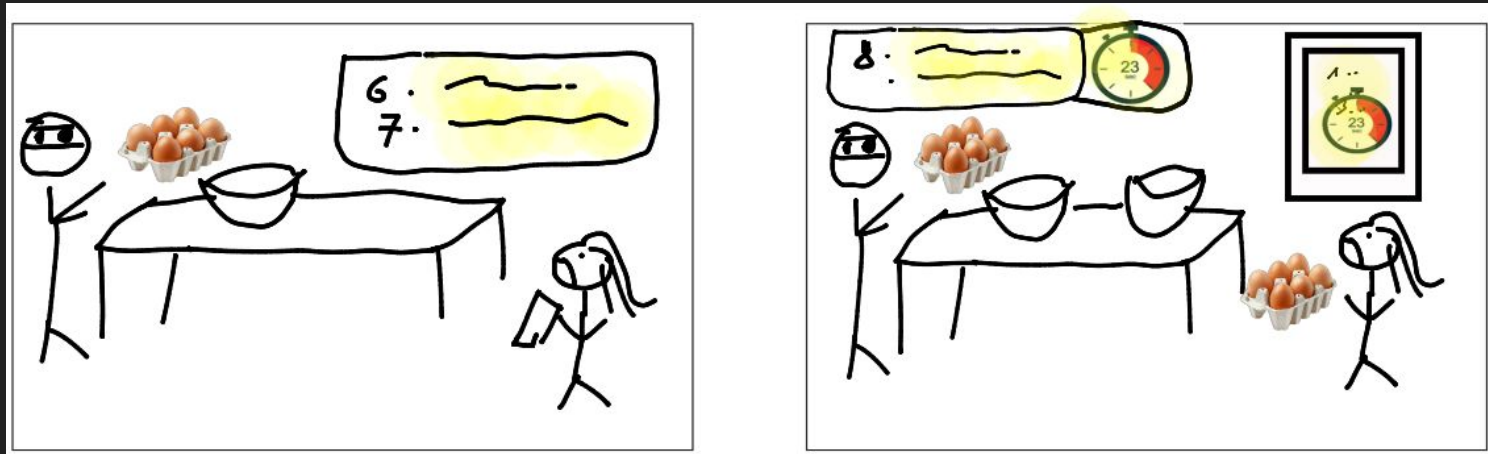

Motivation

- Baking is great
- But baking with HMD is cooler ;)
- Often You need additional information while baking
- → Gamification so it does not get boring

Vision & Key Elements

- we can also play against the clock ...or...
- With a Multi-User Setup

DEMO

Challenges

- Synchronisation of headsets
- Wifi signal stability on headsets
- Flat learning curve for new users and developers
- Latency and lags in multi-user environments
- Difficulty debugging in a multi-headset setup

Conclusion

- A very engaging and exciting way to learn Mixed Reality (MR)
- One week is a bit stressful for fully exploring the topic
- Several technical and usability challenges persisted throughout
